

Content Admin:

- Data privacy is top priority like copy / paste / screenshot / screen recording/ photo not allowed
- Course Structure maintain by Content admin.
- Under course modules, the Content Admin can add content.
- Later, module names can be changed to meaningful topic names. Additionally, new Modules Names can be added by the Content Admin if required.
- For example, Module 1 can be renamed to 'Operators' by the Content Admin. The Content Admin can also create a new module, such as Module 6, which is not part of the default structure, and later rename it as needed.
- Other Tags (Topic): Any additional tags required for topic created and managed by the Content Admin.
- Course topics organization follows Udemy Style

- A Single course can be assigned to two different Content Admins. During this time, one can work on resources such as PDFs, another can work on MCQs, and the other can work on problem statements.
- the Super Admin should be able to track the activities of the Course Admin, including when each topic is added or modified, along with a timestamp.
- Two or more colleges assigned to Single Enroll or Exam Coordinator
- If any feature is referenced in the document or linked to this role, it must be addressed.

Any content updated in a course must be immediately reflected in the user's account.

Exam Coordinator:

- Assessment creation using the available question bank (data security important), allowing the combination of different sections into a single paper.
- Question paper format must be good like color combination, font family etc
- Assign a question paper to a specific batch or section for conducting assessments.

Reuse question paper in future directly if required

- Schedule assessments and modify the schedule, such as extending the duration.
 - Assessment Report Levels (Sections of Question paper-Wise and Overall)
Generate assessment reports at various levels with section-wise and overall summaries:
1. **Individual Student - Single Assessment (Section-Wise and Overall):**
Report for one student on a specific assessment, with section-wise and overall performance. Here section means technical, aptitude, verbal... parts in exam
 2. **All Students - Single Assessment (Section-Wise and Overall):**
Consolidated report for all students in a section for a specific assessment, including overall statistics.
 3. **All Students - All Assessments (Section-Wise and Overall):**
Comprehensive report covering all students in a section across all assessments, along with an overall summary.
 4. **Individual Student - All Assessments (Section-Wise and Overall):**
Detailed report for a single student across multiple assessments, including section-wise breakdown and overall performance.
 5. **Overall Summary Report:**
An aggregate report summarizing assessment data across all sections and students, providing insights into trends and performance metrics.
